ALL NEW, ALL CAMARO

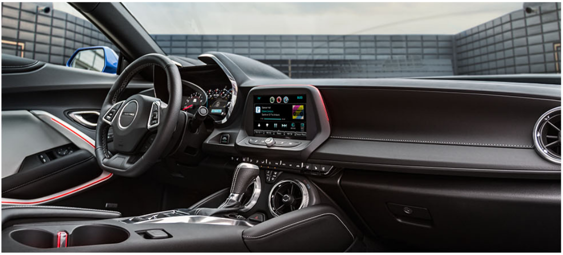
Designers were challenged to sculpt a modern Camaro body around a smaller, lighter architecture while respecting the predecessor's design. This allowed for a smaller, wider, more athletic Camaro shape. These

of corners, and a noticeably more nimble performance. Tighter proportions also let the aggressive body features like the fastback profile and rear quarter panels become more pronounced, creating a road tighter proportions, in a sports car that shed up to 177 kilograms (390 pounds) translates into more responsive braking, better attack in and out

presence that's hard to ignore.

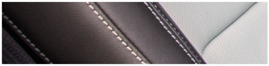
Aerodynamically chiseled to perfection

The lessons of extensive wind tunnel testing hours can be found chiseled across the redesigned Camaro sports car. From the wider opening and precise draft angle of the grille, to the roof's striking "reverse mohawk" channel, to the lift-reducing stanchion spoiler, the design of every surface and edge was scrutinized until it helped improve airflow and performance.

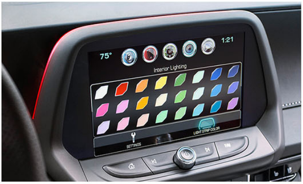


Refined and driver-centric

Premium materials. Rich textures. Tailored stitching. This degree of refinement comes standard inside all Camaro models. But take the driver seat to discover the entire layout is optimized for performance driving. The all-new redesign includes:



- Rotating HVAC dials replace extra dash buttons for quicker, intuitive climate control operation
- A centre console layout with dual cup holders and ample storage, yet exceptional ergonomics for shifting
- The leather-wrapped (optional heated) steering wheel's flat-bottom gives extra room for knees during manoeuvres
- An available 203 mm (8-in.) radio touchscreen
- An available reconfigurable instrument cluster to display key performance and vehicle info
- Seating with aggressive bolsters and available heating/ventilation boosts comfort and provide support when enduring g-forces



24 COLOURS

Interior spectrum lighting

Interior spectrum lighting, available on Camaro 2LT and standard on Camaro 2SS, courses around the radio, door trim and cup holders, transitioning between 24 selectable colours. The colour spectrum reacts to changes in drive modes, the lighting gives off an ambient nighttime glow, and selecting "show mode" triggers a pulsing, full-colour light show.

OWNS THE OPEN SKY

From the fully automatic soft top that seamlessly disappears beneath the hard tonneau cover, to modular underbody bracing to allow the same sharp, nimble handling as the coupe, the Camaro Convertible is a high-tech masterpiece. It even lets you raise or lower the top with a single button while driving up to 48 km/h, or lower it remotely with the keyfob.

LT with RS Package *SS* *LT with RS Package*

Camaro LT

All Camaro models start from a toned exterior sculpted for aerodynamic efficiency. LT comes standard with 18-inch aluminum wheels, LED daytime running lamps, halogen projector-beam headlamps and a grille unique to LT. Add the RS Appearance Package for:

- 20-inch 5-split spoke aluminum wheels
- Decklid-mounted lip spoiler
- HID headlamps with LED signature
- LED tail lamps
- Chrome-accented grille with iconic RS badging

Camaro SS

Go all the way with the legendary Camaro SS. Rule road and track with standard 20-inch wheels, HID headlamps with LED signature accents, LED tail lamps, a full suite of intelligent performance technologies, plus:

- Unique rear stanchion spoiler
- Distinct hood with functional air vents
- Wide, assertive grille with integrated brake cooling ducts
- A 6.2L LT1 V8 engine with 455 HP and 455 lb.-ft. of torque
- Available Magnetic Ride Control®

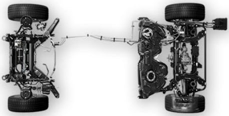
ALL-NEW PERFORMANCE FROM THE GROUND UP

What happens when an all-new, lightweight platform joins forces with precision steering, a sophisticated suspension system and a full suite of performance technologies? You engineer a Camaro up to 177 kg (390 lb.) lighter, and 28% stiffer than its predecessor, giving the driver a tight, positively precise feel and connection to the road.

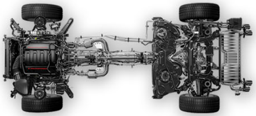
THE INSIDE STORY

Reveal the components behind the power, agility and refinement of the 2016 Camaro sports car.



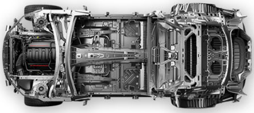
HANDLING

- Brembo® brakes are standard on SS
- All wheels options are lightweight aluminum Enhanced Magnetic Ride Control® is now available on SS



POWERTRAIN

- The available dual-mode exhaust changes sound with each of the three (four with SS) driver-selectable modes[4]
- A new 8-speed paddle-shift automatic transmission is available on all Camaro models and includes a remote vehicle starter
- SS is track-ready with standard extra-capacity radiator, differential and transmission oil coolers, and a limited-slip differential



ARCHITECTURE

- All-new architecture helped lighten Camaro by up to 177 kg (390 lb.) vs. the fifth-gen Camaro
- With a 28% increase in structural rigidity vs. the fifth-gen, drivers will feel advantages like nimble, balanced handling and precise steering
- Aluminum suspension components reduce unsprung mass

COCKPIT

- Soft, premium trim at driver touch points such as knee and elbow pads
- Air vents control temperature and airflow using rotational trim rings
- This advanced generation includes standard OnStar® 4G LTE with available Wi-Fi®[5]

BODY

- Functional hood vents on SS help the LT1 V8 keep cool and reduce front end lift
- The roof, seamlessly laser-brazed to shed mass, is reinforced by a "reverse mohawk" design
- The fastback profile widens rear fender flares, making the car look ready to strike

Power and efficiency without the sacrifice

However you want to drive, Camaro has a powertrain option tailored for you. From the standard 275 hp 2.0L turbo 4 to the available 455 hp LT1 V8 powerhouse, learn why there are zero compromises of power or efficiency regardless of which engine you choose.

2.0L TURBO

The sports car's mass-savings allows the LT's standard turbo 4 cylinder engine to put all of its 275 hp and 295 lb.-ft. of torque to work. Expect exceptional efficiency plus superb handling and braking, and 0 to 96 km/h manual time of 5.4 seconds[3] (5.5 automatic).

6.2L V8

The LT1 V8 catapults the automatic Camaro SS 0 to 96 km/h in 4 seconds flat[3] (4.3 manual) with 455 hp and 455 lb.-ft. of torque. And with the combined technologies of Direct Injection, Variable Valve Timing and Active Fuel Management® (automatic), its efficiency is equally impressive.

3.6L V6

All-new and available on LT, the V6's 335 hp and 284 lb.-ft. of torque are balanced with Direct Injection and Variable Valve Timing. On the 8-speed automatic, you get Active Fuel Management and a 0 to 96 km/h time of 5.1 seconds[3] (5.2 manual).

GET IN GEAR

Whether you choose the convenience of the available 8-speed paddle-shift automatic, or the tactile control of the 6-speed manual with Active Rev Matching on SS, either transmission option makes for an exhilarating driving experience.

Driver mode selected

Customize your driving experience by selecting between Sport, Tour and Snow/Ice (and also Track with SS) drive modes to instantly tailor up to eight different vehicle characteristics.

View Modes

Raise your roar

Available with V6 and V8 powertrains, the dual-mode exhaust system features quad outlets and electric valves that open and close the active exhaust. It's tuned to allow peak performance at high speeds and aggressive idle, and a less aggressive presence at steady cruising speeds. Also, the Drive Mode Selector calibrates a unique exhaust note for each mode.

CONTEMPORARY DESIGN

The restyled front end catches your eye with its chrome-accented dual-port grille, while new halogen projector-beam headlamps and available LED daytime running lamps add illuminating detail. For a refined, polished finish, the rear reveals bright accents and sculpted tail lamps. And the rectangular-shaped dual tailpipes on the available 3.6L V6 model make an aggressive statement. New 18-inch custom-styled aluminum wheels are standard on LTZ models. The redesigned 2016 Equinox brings a fresh approach to modern-day practicality.

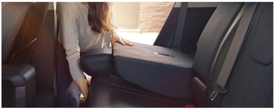
INTERIOR

The ultimate multitasker

The 2016 Equinox has an array of standard new features. From the rear vision camera and 178 mm (7-in.) diagonal colour touch-screen, to the ample storage options, you'll find impressive details everywhere you look. The premium cloth seats on the LS and LT models provide a superb level of comfort while the available Saddle Up interior colour on, exclusive to the LTZ model, amplifies the design. Whether it's generous rear-seat legroom or modernized refinements, every detail has been designed with your comfort in mind.



Folds, flexes and fits

Transform your Equinox into an everyday space solver. The Multi-Flex® sliding rear seat slides back to add almost 200 mm (8-in.) of rear-seat legroom, slides forward for more cargo room, or folds down to create 63.7 cubic feet of cargo space.[2] Convenient 60/40 split-folding seats provide additional cargo-carrying flexibility. Bring it on: groceries, camping gear – you name it. With this fuel-efficient SUV,[4] errands and road trips are effortless.

ADVANCED, RESPONSIVE SAFETY

The Equinox LTZ offers a new host of available safety features for 2016. Available Side Blind Zone Alert[5] provides side mirror alerts to help the driver avoid crashing into a moving vehicle detected in their side-blind spot (or zone) during a lane-change manoeuvre. Available Rear Cross Traffic Alert, when in reverse, helps the driver avoid crashing into approaching detected left- or right-cross traffic (e.g., out of a crowded parking space or driveway with side obstructions). In addition to these new features, Rear Park Assist, Forward Collision Alert and Lane Departure Warning are available on LT and complement the standard safety package on LTZ.

More Safety

Safety starts with you. Safety features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Read the vehicle's Owner's Manual for more important safety information.

PERSONALIZED TECHNOLOGY

The Equinox offers available state-of-the-art technology designed to seamlessly integrate into your lifestyle. Make phone calls, compose texts – even play your favourite songs all through voice-activated commands. You're always connected without lifting a finger.

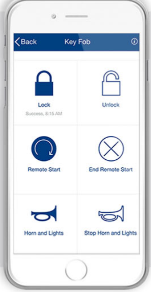
Your Equinox offers available 4G LTE with Wi-Fi®[4]. OnStar with 4G LTE provides a better in-vehicle experience than you'll get with your smart-phone. Our stronger signal means you have a reliable connection. You will have the ability to connect up to seven devices[4], giving direct access to streaming content, music, entertainment and more.

Siri Eyes Free[8]

For compatible iPhone® users, the system allows limited hands-free interaction for those times when you want to read or compose a text message, make a phone call or play your favourite music.

Chevrolet MyLink[9]

Chevrolet MyLink®[9] with Bluetooth® wireless technology[10] makes it easy to connect to calls, music and contacts– all by using voice commands or the 178 mm (7-in.) diagonal colour touch-screen display.



ONSTAR REMOTELINK[11] MOBILE APP

The standard OnStar Basic Plan[12] keeps you connected for five years and includes select features of the RemoteLink mobile app as well as limited OnStar services, like Advanced Diagnostics† and dealer Maintenance Notification to help you schedule service.

INTRO TECHNOLOGY PERFORMANCE SAFETY DESIGN

MADE WITH HIGH STRENGTH STEEL. BUILT WITH GRIT.

Built to grind out the toughest jobs, the 2016 Silverado 2500HD takes your work as seriously as you do. From its innovative cargo box to iconic heavy-duty engines, capable of towing up to 8,165 kg (18,000 lb.)[3] every detail has a purpose. Stronger, smarter and bolder than ever. No wonder this truck is from the family of Canada's fastest growing brand of pickup trucks in 2015.[6]

SILVERADO VS. THE COMPETITION

Pro football Hall of Famer Howie Long and Chevrolet Chief Engineer Eric Stanczak hit the road to see how the 2015 Silverado 2500HD stacks up against the 2015 Ford F-250 in a pair of critical field tests.

POWER WITH A PURPOSE

Power is important. Choices are too. That's why Silverado HD offers two proven heavy-duty truck powertrains: the standard gasoline-powered Vortec® 6.0L V8 mated to the heavy-duty Hydra-Matic 6L90 automatic transmission, and available Duramax® 6.6L V8 Turbo-Diesel teamed to the legendary GM-exclusive Allison® 1000 Series automatic transmission. Both powertrains have been engineered to work in tandem with our advanced standard trailering technologies, like powertrain grade braking, trailer sway control and hill start assist in order to deliver exceptional control and capability even in the most challenging conditions.

HORSEPOWER/TORQUE

The standard Vortec 6.0L V8 builds power at a low rpm for a flatter torque curve. It reaches peak horsepower (330) at only 4600 rpm, and peak torque (360) at 4200 rpm.

LONGER RANGE, SMALLER FOOTPRINT

A bi-fuel version of the Vortec 6.0L V8 is available on Silverado 2500HD that can seamlessly switch between gasoline and compressed natural gas (CNG). The combination of cleaner-burning CNG and regular gasoline gives the truck improved range when both tanks are filled and flexibility to operate on gasoline where CNG availability may be limited.

PAYLOAD

Fully boxed frame rails made of high-strength steel and nine cross-members make the frame immensely strong and resistant to bending and twisting. This results in a foundation that helps Silverado 2500HD achieve a maximum payload rating of 1,603 kg (3,534 lb.).[4]

AVAILABLE DURAMAX V8 TURBO-DIESEL V8 WITH ALLISON TRANSMISSION

Silverado HD with the available Duramax® Diesel engine and industry-exclusive Allison® 1000 Series automatic transmission is cut out for the most demanding jobs. See how it works.

QUICK START

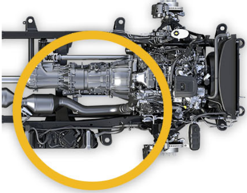
Duramax features microprocessor-controlled glow plugs that heat up quickly and, together with high pressure common rail Direct Injection, help the Duramax Diesel start in as few as three seconds in temperatures as cold as -29°C (-20°F).[7]

LOAD IT UP

Silverado 2500HD with the available Duramax Diesel engine offers a payload capacity of 1,486 kg (3,275 lb.)[8]

DIESEL EXHAUST FLUID (DEF)

Stored in a 20 litre (5.3 US gal.) tank under the hood, DEF is a non-toxic, non-flammable urea-based solution used with diesel engine exhaust systems to help break down oxides of nitrogen (NOx) into harmless nitrogen gas and water vapour. The use of DEF also helps improve fuel efficiency by increasing the range between Diesel Particulate Fiter burn-off cycles up to 1,100 km.

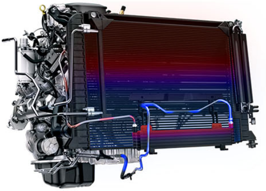


BRAKE WITH CONFIDENCE

The available Duramax Diesel includes a standard Exhaust Brake System that works in conjunction with the Allison transmissions-grade braking feature to help maintain your desired speed and preserve your brakes while driving downhill. The result is improved confidence and control, especially when hauling or towing heavy loads.

HANDLE THE PRESSURE

The available Duramax 6.6L V8 Turbo-Diesel engine features a strong deep-skirt cast-iron block with a forged steel crankshaft that is nitride surface hardened and forged steel connecting rods to help limit wear and ensure maximum durability.



KEEPING IT COOL

All HD models include a heavy-duty external engine oil cooler as well as an auxiliary external transmissin oil cooler to help maintain optimal powertrain temperatures under heavy load as well as to help ensure long-term reliability. Models fitted with the Duramax Turbo-Diesel feature a charge air cooler to help cool the compressed combustion intake air from the turbocharger (increase air density) and deliver consistent power even in the hottest conditions.

GET SOMETHING SERIOUS TO TOW

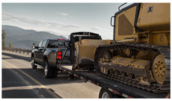
In addition to big-time towing capacity, Silverado HD has several built-in high-tech systems designed to take the white knuckles out of big challenges. Systems like the push-button activated Diesel Exhaust Brake, on Duramax equipped models, that can work in tandem with the transmissions tow/haul mode and powertrain grade braking features to help you maintain control when hauling or towing heavy loads down steep grades. These built-in smart towing technologies also help reduce brake fade and can help prolong brake pad and rotor life. So you can settle back and enjoy the drive when you tow with

2500HD tows up to:

- 6,713 kg (14,800 lb.) 5th-wheel towing capacity[9] with standard Vortec 6.0L V8
- 6,577 kg (14,500 lb.) conventional towing capacity[10] with standard Vortec 6.0L V8
- 8,165 kg (18,000 lb.) 5th-wheel towing capacity[9] with available Duramax 6.6L V8 Turbo-Diesel
- 6,577 kg (14,500 lb.) conventional towing capacity[11] with available Duramax 6.6L V8 Turbo-Diesel

Silverado HD.

TRAILERING CONTROLS KEEP YOU IN COMMAND



Keep your trailer in line

Trailer Sway Control detects when your trailer is swaying and applies the truck and/or trailer brakes and reduces engine power, if necessary, to bring the trailer back under control and keep it on its intended path. An integrated trailer brake controller is standard on LTZ and High Country, available on WT and LT models.

Built-in 5th-wheel

With pre-drilled access holes in the rear frame section, Silverado HD makes it easy to install the 5th-wheel or gooseneck-style hitch of your choice. You can also specify available trailer wiring provisions for your 5th-wheel or gooseneck trailer.

Available Rear Vision Camera

The centre screen serves as a monitor for the available Rear Vision Camera, using dynamic grid lines to help when backing up or hitching a trailer.

Ready to bear the load

Silverado HD features a roll-formed steel cargo box that's lighter, stronger and more durable than traditional stamped-steel boxes, so you can secure the heaviest loads with confidence.

Multiple ways to tie down cargo

Secure cargo your way with available upper and lower tie-down hooks rated to secure 113 kg (250 lb.)[1,2] each. Reconfiguring your setup in the dark? Available LED lighting enhances visibility.

Spray-on bedliner

The available factory-installed spray-on bedliner adds a permanent protective layer to your cargo box. Thick, water-sealed and finished with the Chevy Bowtie, it's an effective way to prevent damage to the bed of your truck.

CornerStep rear bumper

Sometimes a step can make all the difference. Prop yourself up with the built-in CornerStep rear bumper to reach cargo more easily. It is an elegant cargo bed access solution that does not add weight or complexity, like some competitive systems do.

STRENGTH THAT STANDS OUT

Quiet. comfortable interior

More comfort, less noise. That's life inside the Silverado heavy-duty truck. The cabin is quiet, thanks in part to sound-deadening materials and inlaid, triple-sealed doors, while dual firmness foam seats provide added comfort and support.

Controls within reach

Centrally located controls put important functions at your fingertips, while large knobs and buttons are conveniently designed to accommodate gloved hands.

Forward hinged rear doors

Forward-hinged rear doors make getting in and out of Double Cab models of Silverado HD easier.

THE EXCLUSIVE HIGH COUNTRY

Powerful meets premium with the exclusive 2016 Silverado HD High Country trim level available on Crew Cab models. It includes:

PURE. ELECTRIC. FUN.

It's time to put gas stations in your rear view. The 2016 Spark EV is an electric vehicle that features a lithium-ion battery that offers gas-free and tailpipe-emissions-free power and performance.

BUILD & PRICE
Build and price your vehicle

LOCATE A DEALER
Locate a dealer near you

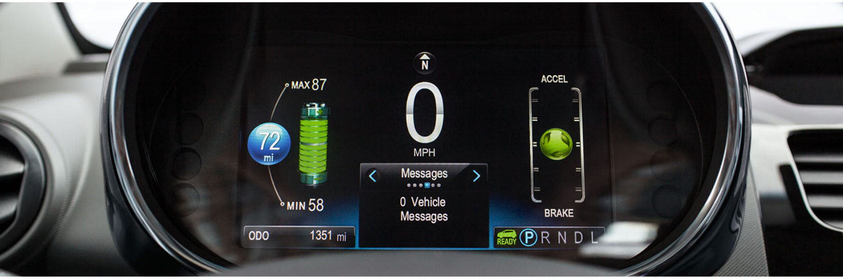
READY FOR ACTION

Spark EV features an innovative electric propulsion system drive unit paired with a lithium-ion battery. Without the traditional transmission, torque goes directly to the tires on the road. That's how Spark EV achieves 0 to 96 kph in 7.2 seconds.[5] And with 327 lb.-ft. of torque, this electric vehicle is best-in-class.[6]

7.2 SECONDS 0-96 KM/H

327 LB./FT. TORQUE

10.3 METRE TURNING RADIUS



ALL ELECTRIC ADVANTAGE

It's easy to keep an eye on battery charge and how energy is being used and created. Spark EV gives you instant digital feedback through a 178 mm (7-in.) diagonal LCD screen in the Driver Information Centre so you can get the most out of every kilowatt.

The power of efficiency

You can help enhance this electric ride's efficiency and have fun doing it. One of the greatest factors in getting the most out of each charge is driving style, so simply keep the green ball in the centre of the Efficiency Gauge and enjoy optimal battery efficiency in your electric vehicle.

GET CHARGED UP

When it comes to charging, you've got options. The standard 120V cord plugs into any household outlet, or for a faster charge, available 240V chargers can fully power up the battery in just seven hours.[7] And Spark EV vehicles equipped with the available DC Fast Charging option can visit a Fast Charging station and charge the battery to 80% in just 20 minutes.

The kilometres you'll go

No matter how you charge Spark EV, you will feel the savings. With an average of 1.8 Le/100 km city[8,4] and 2.2 Le/100 km highway,[8,4] and a range of up to 131 km[4] per charge, Spark EV brings you savings for the long haul.

Harness the energy

Spark EV features regenerative braking, which captures energy that would otherwise be lost while braking, decelerating or going downhill. It also offers liquid thermal conditioning, which maximizes its performance in extreme weather conditions. This provides the best performance from the battery and helps ensure its longevity. And the battery is backed by an 8-year/160,000-kilometre limited warranty.[9]

MASTER EVERY ROUTE

- OnStar® Guidance Plan standard for the first three years (trial excludes Hands-Free Calling minutes)[14]
- Connect with an OnStar Advisor who can offer voice-guided turn-by-turn directions

DARING DESIGN

Dedicated collaboration between designers and engineers resulted in this city car with a fiercely dramatic design. It's sleek and seamless from grille to rear spoiler. So no matter where you go, you're sure to turn a few heads along the way.

Styled for distance

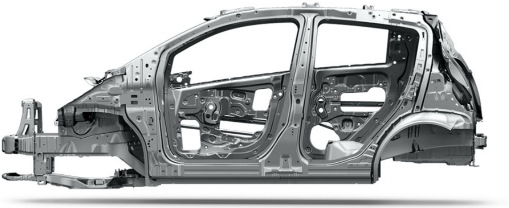
The interior balances a flowing, spacious design with a get-up-and-go spirit. Features like bright Electric Blue accents, chrome and available leatherette mix with a sporty cockpit vibe complete with a motorcycle-inspired instrument cluster.

Quiet inside and out

Because it's electric, Spark EV is surprisingly quiet on the outside, but due to interior refinements along with sealing and insulation, it's uniquely quiet on the inside too.

Room to spare

With 2,444 L (86.3 cu. ft.) of passenger space, the 2016 Spark EV has more passenger interior volume than the Fiat 500e, smart electric drive, and the Mitsubishi i-MiEV. Seat four comfortably or cart your stuff around town. Fold down the rear seat and have a full 662 L (23.4 cu.ft.)[15] of storage space.



ALL-AROUND SAFETY

Spark EV offers a host of advanced safety features to help keep you safe every time you drive. Now you can set out on the road with confidence and feel protected wherever you go.

Safety features are no substitute for the driver's responsibility to operate the vehicle in a safe manner. The driver should remain attentive to traffic, surroundings and road conditions at all times. Read the Spark Owner's Manual for more important safety information.
