5 THE NEXT STEP IN WORLD-CLASS LUXURY

What puts a luxury sedan in a class apart? We believe it's confidence. The confidence of advanced performance and innovative safety features. Style that draws admiring glances. A higher level of comfort and refinement. And next-generation infotainment. In short, the kind of confidence you find in abundance in the new 2014 Buick LaCrosse.

6 INTERIOR

The ice-blue ambient lighting, warm woodgrain tones and smoked-chrome accents you'll find in the 2014 LaCrosse surround you in style. The central instrument panel and console have been thoroughly updated to create a layout that's both simple and pleasing. And the new, available Ultra Luxury Package with genuine Tamo Ash wood trim and supple semi-aniline leather seating is a sensory delight.

SOPHISTICATED CONVENIENCE

For easier, more intuitive operation, the 2014 LaCrosse's redesigned "centre stack" uses a new capacitive touch screen that reduces the number of buttons you need to navigate the advanced Buick IntelliLink™ infotainment system.

203-MM DRIVER INFORMATION DISPLAY

LaCrosse's new 203-mm (8-in.) diagonal Driver Information Centre and Cluster Display can be reconfigured so the information you want most is the only information you see.
